

Panasonic ENERGY

SUMMER '25 INTERNSHIP PROGRAM

12 WEEK PROGRAM: MAY 19TH - AUGUST 8TH 2025

ABOUT PANASONIC ENERGY OF NORTH AMERICA, AND OUR INTERNSHIP PROGRAM

Over the last few years, the gigafactory has grown from a pile of dirt to the largest lithium-ion battery factory in the world. Together with our partner Tesla, we continue to revolutionize the lithium-ion battery space and accelerate the world's transition to sustainable energy and transportation.

The purpose of PENA's Internship Program is to provide an entry-level experience into our organization, develop an early talent pipeline for potential employment and to provide learning and development opportunities within Panasonic and PENA. Our program provides undergraduate students an opportunity to gain practical work experience through working on business-driven projects and exposing them to the work done at PENA.

INTERNSHIP OPPORTUNITIES IN RENO, NV AND DESOTO, KS

Engineering | Digital Transformation | HR | IT | Supply Chain Management | Continuous Improvement | Production | Chemistry | EHS | Facilities | Manufacturing | Program Management | Quality

“I ended up staying with PENA because it's a great job! During my internship I barely started to scrape the surface of what I could learn here. I knew this position would be so valuable for me going forward in my career.”

Conner Fissell
